DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/03/07 has been entered.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Marcus on 06/14/07.

The application has been amended as follows:

Cancel claim 82 without prejudice.

Claim 53, 55-56, 58, 60, 62, 84, and 85, change "A non-volatile memory card" to
- - The non-volatile memory card - -.

For clam 63, the current amended claim should be below:

63 (**second currently amended**) A non-volatile memory card, comprising:

a bottom surface including a first planar portion and a second planar portion residing in a different plane than the first planar portion;

a top surface opposite the bottom surface, the top surface having a raised portion; a bottom edge extending between the top and bottom surfaces; a top edge opposite the bottom edge; a pair of side edges extending between the top and bottom surfaces and the top and bottom edges, one side edge of the pair of said edges including first and second sections extending generally parallel to each other and a third section extending between the first and second sections and forming an oblique angle with each of the first and second sections, one of the first and second sections including a notch;

a set of contacts on said bottom surface, in the first planar portion and adjacent the top edge,

a circuit board in said card

a plurality of non-volatile storage elements enclosed within said card; and

passive electrical elements enclosed within said card, said passive electrical elements are positioned in said second portion; and

molding compound encapsulating the printed circuit board and plurality of non-volatile storage elements, the molding compound generally defining the top and bottom surfaces, the top and bottom edges and the pair of side edges;

test pins, exposed through a surface of the molding compound, for testing operation of the non-volatile storage elements;

a conformal coating removably covering the test pins.

For claim 80, the current amended claim should be shown below:

80, **(second currently amended)** A non-volatile memory card, comprising:

- a bottom surface;
- a top surface opposite the bottom surface, the top surface having a raised portion;
- a bottom edge extending between the top and bottom surfaces;
- a top edge opposite the bottom edge;
- a pair of side edges extending between the top and bottom surfaces and the top and bottom edges, one side edge of the pair of said edges including first and second sections extending generally parallel to each other and a third section extending between the first and second sections and forming an oblique angle with each of the first and second sections, one of the first and second sections including a notch;
- a set of contacts on said bottom surface, in the first planar portion and adjacent the top edge,
- a circuit board in said card;

molding compound encapsulating the printed circuit board and plurality of non-volatile storage elements, the molding compound generally defining the top and bottom surfaces, the top and bottom edges and the pair of side edges;

test pins, exposed through a surface of the molding compound, for testing operation of the non-volatile storage elements; and

a conformal coating removably covering the test pins, and

non-volatile storage elements enclosed within said peripheral card; and
a passive electrical component enclosed within said removable peripheral card, said
passive electrical element is positioned in said second portion.

Allowable Subject Matter

2. Claims 52-53, 55-56, 58, 60, 63-67, 69-70, 73, 80, and 83-85 are allowed
(renumber claims are 1-19).

The following is an examiner's statement of reasons for allowance:

Neither the references cited nor the cited references teach, suggest or obvious in
combination of the non-volatile memory card having molding compound encapsulating
the printed circuit board and plurality of non-volatile storage elements, the molding
compound generally defining the top and bottom surfaces, the top and bottom edges
and the pair of side edges; test pins, exposed through a surface of the molding
compound, for testing operation of the non-volatile storage elements; and a conformal
coating removably covering the test pins.

Any comments considered necessary by applicant must be submitted no later
than the payment of the issue fee and, to avoid processing delays, should preferably
accompany the issue fee. Such submissions should be clearly labeled "Comments on
Statement of Reasons for Allowance."
